	Description	List Price	CA Sales Tax 9.50%
	<p>This is the "Space Necklace", the links are 18k yellow gold, the disks with the 96 gems are sterling silver and the beads are polished garnet. I started with a series of sterling silver disks that I formed by pouring molten silver into a round crucible. The disks reminded me of moons or asteroids with craters and other geological features on one side and a molten wrinkled look on the other. I worked the disks with a hammer to harden the surface and give them a shine before darkening the sterling for contrast. I then set 96 various stones including diamonds, rubies, yellow & blue sapphires, amethysts, opals and moonstones into the craters. The entire piece is articulated with each disk free to pivot within the gold links on axis pins. The gold links are hinged to allow the entire piece to conform to your body and move with you. The four strands of garnet beads on each side are attached by pivoting harnesses to allow free motion. The clasp is a double catch design with small diamonds set in the two release buttons.</p>
